

# CLUE #7

This animal was with their family when they heard the warning sound and was able to escape just in time!

Can you identify the escapee from the evidence left behind?

## CLUE #6

This “masked” animal saw the crime and decided to take advantage of the situation. The partner in crime ate some of the victim’s eggs since there was no one left to guard them!

This evidence was found at the scene.

# CLUE #5

Terrified and alarmed, this animal heard the warning sign and decided to run from danger.

Here are the clues left behind by the survivor.

# CLUE #4

This animal noticed the predator in the wetland  
and warned others by making a loud sound.

Here are some additional clues to help identify the  
hero of the day.

## CLUE #3

This animal witnessed the attack as he was sitting high up in a tree.

Can you identify the witness from the pieces of evidence found at the bottom of the tree?

## CLUE #2

This sly animal was able to sneak up on the prey with ease but left a few clues behind.

Can you identify the predator?

# CLUE #1

This animal was taken by surprise and eaten for lunch.

All that is left to identify the victim (prey), are these clues found near the crime scene.
